FEE SCHEDULE

The final determination of valuation, occupancy, and/or construction type under any of the provisions of this order shall be made by the Building Official.

A. Building Permits

The valuation to be used in computing the building permit and the building plan review fees shall be the total value (rounded up to the nearest dollar) of all construction work for which the permit is issued, as well as all finish work, painting, roofing, electrical, plumbing, heating, air conditioning, elevators, fire extinguishing systems and any other permanent equipment. It also includes the contractor's profit which should not be omitted.

The fees for each permit shall be as set forth in Tables A-1, A-2, and A-3. Valuation will be calculated using the City's valuation table as required by the State of Oregon multiplied by the square footage of the structure or as stated by the applicant, whichever is greater. The cost per square foot of carports, decks, 1 & 2 Family Dwelling pole buildings, and covered porches/patios shall be 50% of the valuation indicated for "Private Garages" on the City's valuation table.
