

# **L.** CITY GLOSSARY

## DEFINITIONS

**Community Governance:** An approach to governing which focuses on the citizens of Salem as the ultimate customer and expands upon the ideals of customer service to the point of incorporating individuals and citizen groups in meaningful planning, implementation, and evaluation of government services. Community Governance relies upon the active participation of members from all levels of the governmental organization - participation with individuals and citizen groups in the identification of community issues, the development of alternatives, solicitation of support, and the refinement, implementation, and evaluation of services - on an ongoing basis.

**Community Policing:** A philosophy and an organizational strategy that promotes a partnership between the people and their police. It is based on the premise that both the police and their community must work together to identify, prioritize, and solve contemporary problems such as crime, drugs, fear of crime, social and physical disorder, and overall neighborhood decay, with the goal of improving the quality of life in the area.

## ACRONYMS
